INDEX TO VOLUME 104

INDEX TO SUBJECTS

Absolute Magnitudes of Dwarf M Stars, Motions and. *A. N. Vyssotsky* 239

Absorption Coefficient of the Negative Hydrogen Ion, On the Continuous. III. *S. Chandrasekhar and Frances Herman Breen* 430

Absorption Lines on the Temperature Distribution of the Solar Atmosphere, The Effect of the. *Guido Münch* 87

Absorption to Reddening, The Ratio of Interstellar. *Jesse L. Greenstein* 403

Absorption Spectrum of Air in the Region λλ 600–2000, Ultraviolet. *J. J. Hopfield* . . 208

Z Andromedae and AX Persei, The Light-Curves of. *Cecilia Payne-Gaposchkin* . . . 362

R Aquarii, The Light-Curves of. *Cecilia Payne-Gaposchkin and Constance Boyd* . . . 357

θ Aquilae, Spectroscopic Observations of. *Carlos U. Cesco and Otto Struve* 282

α Boötis and 70 Ophiuchi A, A Comparative Study of the Spectra of. *Suzanne E. A. van Dijke* 27

β Canis Majoris, Some Radial-Velocity and Line-Intensity Measures in the Spectrum of. *Anne B. Underhill* 388

27 Canis Majoris, The Radial Velocity of. *O. Struve* 459

Clusters, The Diameters of Globular. *Albert G. Mowbray* 47

Clusters, The Radial Velocities of Fifty Globular Star. *N. U. Mayall* 290

Color Indices of A-Type Stars, On the Interstellar Reddening in the Region of the North Polar Sequence and the Normal. *W. W. Morgan and W. P. Bidelman* 245

Cometary Nuclei, Structure and Mass of. *B. Vorontsov-Velyaminov* 226

Continuous Absorption Coefficient of the Negative Hydrogen Ion, On the. III. *S. Chandrasekhar and Frances Herman Breen* 430

Continuous Emission in the Orion Nebula. *Jesse L. Greenstein* 414

Continuous Spectrum of the Sun and the Stars, The. *S. Chandrasekhar and Guido Münch* 446

T Coronae Borealis, The Photographic Light-Curve of. *Cecilia Payne-Gaposchkin and Frances W. Wright* 75

Curve of Growth of γ Cygni. *Jorge Sahade and Carlos U. Cesco* 133

Cycles in *He* I, The Occurrence of. *Anne B. Underhill* 327

γ Cygni Curve of Growth of. *Jorge Sahade and Carlos U. Cesco* 133

V 444 Cygni, A Study of the Extended Envelope Surrounding the Wolf-Rayet Component of. *Zdeněk Kopal and Martha B. Shapley* 160

Dwarf M Stars Found Spectrophotometrically. Second List. *A. N. Vyssotsky, E. M. Janssen, W. J. Miller, S.J., and M. E. Walther* 234

Dwarf M Stars, Motions and Absolute Magnitudes of. *A. N. Vyssotsky* 239

Early-Type Stars, On the Possibility of Tracing Polarization Effects in the Rotational Profiles of. *Yngve Öhman* 460

Eclipsing Binaries, Spectrographic Observations of Fourteen. *Otto Struve* 253

Eclipsing Binary Stars, The Reflection Effect in. *Paris Pişmiş* 141

Eclipsing System RX Geminorum, The. *Sergei Gaposchkin* 376

Eclipsing System RY Geminorum, The. *Sergei Gaposchkin* 383

Eclipsing System UV Leonis, The. *Sergei Gaposchkin* 370

Eclipsing Variables, Rectification of the Light-Curves of. *Henry Norris Russell* . . . 153

RX Geminorum, The Eclipsing System. *Sergei Gaposchkin* 376

RY Geminorum, The Eclipsing System. *Sergei Gaposchkin* 383

Globular Clusters, The Diameters of. *Albert G. Mowbray* 47

Globular Star Clusters, The Radial Velocities of Fifty. *N. U. Mayall* 290

Helium Content of the Sun, On the. *Martin Schwarzschild* 203

He I, The Occurrence of Cycles in. *Anne B. Underhill* 327

Infrared Spectrum of υ Sagittarii, The. *Jesse L. Greenstein and Paul W. Merrill* . . . 177

Interstellar Absorption to Reddening, The Ratio of. *Jesse L. Greenstein* 403

Interstellar Medium, Concentrations of the. *Fred L. Whipple* 1

Interstellar Reddening in the Region of the North Polar Sequence and the Normal Color Indices of A-Type Stars, On the. *W. W. Morgan and W. P. Bidelman* 245

10 Lacertae, The Atmosphere of. *Lawrence H. Aller* 347

UV Leonis, The Eclipsing System. *Sergei Gaposchkin* 370

Light-Curves of Eclipsing Variables, Rectification of the. *Henry Norris Russell* . . . 153

Light-Curves of R Aquarii, The. *Cecilia Payne-Gaposchkin and Constance Boyd* . . . 357

Light-Curve of T Coronae Borealis, The Photographic. *Cecilia Payne-Gaposchkin and Frances W. Wright* 75

Light-Curves of Z Andromedae and AX Persei, The. *Cecilia Payne-Gaposchkin* . . . 362

Limb of the Sun, The Distribution of Brightness at the Extreme. *Zdeněk Kopal* . . . 60

Line-Intensity Measures in the Spectrum of β Canis Majoris, Some Radial-Velocity and. *Anne B. Underhill* 388

Luminosity Characteristics on Low-Dispersion Spectra of Stars of Types M0–M4. *P. C. Keenan and J. J. Nassau* 458

Luminosity Classification of Stars from Spectra of Low Dispersion, Note on the Spectral and. *Bertil Lindblad* 325

Main Sequence Stars Built on the Point-Convective Model, The Internal Temperature-Density Distribution of. II. Sirius A. *R. E. Marshak and G. Blanch* 82

M0–M4, Luminosity Characteristics on Low-Dispersion Spectra of Stars of Types. *P. C. Keenan and J. J. Nassau* 458

Motions and Absolute Magnitudes of Dwarf M Stars. *A. N. Vyssotsky* 239

Motions of the Stars within 20 Parsecs of the Sun, The. *Gustaf Strömberg* 12

Nebulae, On the Direction of Rotation in Spiral. *Bertil Lindblad and Rolf Brahde* . . . 211

Negative Hydrogen Ion, On the Continuous Absorption Coefficient of the. III. *S. Chandrasekhar and Frances Herman Breen* 430

North Polar Sequence and the Normal Color Indices of A-Type Stars, On the Interstellar Reddening in the Region of the. *W. W. Morgan and W. P. Bidelman* 245

Nova Phenomenon, Some Remarks on the. *Svein Rosseland* 324

RZ Ophiuchi, Spectrographic Observations of RY Persei and. *W. A. Hiltner* 396

70 Ophiuchi A, A Comparative Study of the Spectra of α Boötis and. *Suzanne E. A. van Dijke* 27

Orion Nebula, Continuous Emission in the. *Jesse L. Greenstein* 414

AX Persei, The Light-Curves of Z Andromedae and. *Cecilia Payne-Gaposchkin* . . . 362

RY Persei and RZ Ophiuchi, Spectrographic Observations of. *W. A. Hiltner* 396

Photographic Light-Curve of T Coronae Borealis, The. *Cecilia Payne-Gaposchkin and Frances W. Wright* 75

Point-Convective Model, The Internal Temperature-Density Distribution of Main Sequence Stars Built on the. II. Sirius A. *R. E. Marshak and G. Blanch* 82

Polarization Effects in the Rotational Profiles of Early-Type Stars, On the Possibility of Tracing. *Yngve Öhman* 460

Profiles of Early-Type Stars, On the Possibility of Tracing Polarization Effects in the Rotational. *Yngve Öhman* 460

Radial Velocities of Fifty Globular Star Clusters, The. *N. U. Mayall* 290

Radial Velocity of 27 Canis Majoris, The. *O. Struve* 459

Radial-Velocity and Line-Intensity Measures in the Spectrum of β Canis Majoris, Some. *Anne B. Underhill* 388

Radiative Equilibrium of a Stellar Atmosphere, On the. XI. *S. Chandrasekhar* . . . 110

Radiative Equilibrium of a Stellar Atmosphere, On the. XII. *S. Chandrasekhar* . . . 191

Reflection Effect in Eclipsing Binary Stars, The. *Paris Pişmiş* 141

Reviews:

Deborin, A. M. *Galileo Galilei, 1564–1642: A Collection of Essays Dedicated to the Tercentenary of His Death* (N. T. Bobrovnikoff) 148

Ford, J. Edward. *David Rittenhouse* (Roy K. Marshall) 330

Heckmann, Otto. *Theorieen der Kosmologie* ("Fortschritte der Astronomie," No. 2) (W. H. McCrea) 146

Herzberg, Gerhard. *Infrared and Raman Spectra of Polyatomic Molecules* (E. F. Barker) 330

Hiltner, W. A., and Robley C. Williams. *Photometric Atlas of Stellar Spectra* (M. Minnaert) 331

Kopal, Zdeněk. *An Introduction to the Study of Eclipsing Variables* (H. C. van de Hulst) 463

Vavilow, S. I. *Isaac Newton, 1643–1727: A Collection of Essays Dedicated to the Tercentenary of His Birth* (N. T. Bobrovnikoff) 148

Williams, Robley C., and W. A. Hiltner. *Photometric Atlas of Stellar Spectra.* (M. Minnaert) 331

Rotation in Spiral Nebulae, On the Direction of. *Bertil Lindblad and Rolf Brahde* . . . 211

Rotational Profiles of Early-Type Stars, On the Possibility of Tracing Polarization Effects in the. *Yngve Öhman* 460

υ Sagittarii, The Infrared Spectrum of. *Jesse L. Greenstein and Paul W. Merrill* . . . 177

Sirius A, The Internal Temperature-Density Distribution of Main Sequence Stars Built on the Point-Convective Model. II. *R. E. Marshak and G. Blanch* 82

Solar Atmosphere, The Effect of the Absorption Lines on the Temperature Distribution of the. *Guido Münch* 87

Spectra of α Boötis and 70 Ophiuchi A, A Comparative Study of the. *Suzanne E. A. van Dijke* 27

Spectra of Stars of Types M0–M4, Luminosity Characteristics on Low-Dispersion. *P. C. Keenan and J. J. Nassau* 458

Spectral and Luminosity Classification of Stars from Spectra of Low Dispersion, Note on the. *Bertil Lindblad* 325

Spectrographic Observations of Fourteen Eclipsing Binaries. *Otto Struve* 253

Spectrographic Observations of RY Persei and RZ Ophiuchi. *W. A. Hiltner* 396

Spectrophotometrically, Dwarf M Stars Found. Second List. *A. N. Vyssotsky, E. M. Janssen, W. J. Miller, S.J., and M. E. Walther* 234

Spectroscopic Observations of θ Aquilae. *Carlos U. Cesco and Otto Struve* 282

Spectroscopic Observations of ζ^2 Ursae Majoris. *Carlos U. Cesco* 287

Spectrum of Air in the Region $\lambda\lambda$ 600–2000, Ultraviolet Absorption. *J. J. Hopfield* . . 208

Spectrum of the Sun and the Stars, The Continuous. *S. Chandrasekhar and Guido Münch* 446

Spiral Nebulae, On the Direction of Rotation in. *Bertil Lindblad and Rolf Brahde* . . 211

Stability of Stars, On the Dynamical. *P. Ledoux* 333

Stellar Atmosphere, On the Radiative Equilibrium of a. XI. *S. Chandrasekhar* . . . 110

Stellar Atmosphere, On the Radiative Equilibrium of a. XII. *S. Chandrasekhar* . . . 191

Stellar Spectroscopy, An Interesting Phenomenon in. *Otto Struve* 138

Sun and the Stars, The Continuous Spectrum of the. *S. Chandrasekhar and Guido Münch* 446

Sun, The Distribution of Brightness at the Extreme Limb of the. *Zdeněk Kopal* . . . 60

Sun, On the Helium Content of the. *Martin Schwarzschild* 203

Temperature-Density Distribution of Main Sequence Stars Built on the Point-Convective Model, The Internal. II. Sirius A. *R. E. Marshak and G. Blanch* 82

Temperature Distribution of the Solar Atmosphere, The Effect of the Absorption Lines on the. *Guido Münch* 87

Ultraviolet Absorption Spectrum of Air in the Region λλ 600–2000. *J. J. Hopfield* . . 208

ζ^1 Ursae Majoris, Spectroscopic Observations of. *Carlos U. Cesco* 287

Wolf-Rayet Component of V 444 Cygni, A Study of the Extended Envelope Surrounding the. *Zdeněk Kopal and Martha B. Shapley* 160
